I have finally found the perfect way to communicate between iPhone and OS X... Marc San Soucie 6 years ago If you want to transfer files, videos, music or applications between your iPhone and Mac, and you have an iTunes, you'll probably need to use iTunes to push your files out to your iPhone and find/download files on your iPhone to transfer to your Mac. "There are a few paid third-party utilities that will communicate directly between your iPhone and Mac," says Marc San Soucie, a senior consultant at Radware. "My personal preference is the XM FileTransfer." XM FileTransfer was created by Synotic which has a free version and a paid version. XM FileTransfer for Mac is available for the Mac App Store or on the Web for \$19.95. Here's how XM FileTransfer works... -- You'll need to run the free version to explore all the features of XM FileTransfer. The free version is limited to 10-minute transfers, 1GB of data in each direction and a simple text-based file transfer. -- Once you've decided which file transfer program you want, download it to your Mac from the Web. -- Once you've downloaded it, double-click on the.dmg file to run the installer. -- After the installer finishes downloading, run the application. -- The first time you run the application, XM FileTransfer scans your Mac for anything like computers on your network. --Once the scan is finished, you'll be prompted with the first dialog box, which will give you a choice of
