KEYMACRO is a software utility for Microsoft Windows that allows you to create macros that will be active at predefined dates and times. Such macros can include actions that run frequently or at certain events. If you need to perform a specific task repetitively, a macro is an efficient way to do so. Macros can also prove to be of great use for beginners that need to perform the same actions over and over again, as they can be recorded as regular actions and saved for future use. KEYMACRO supports all the available Windows operating systems, ranging from Windows 95 to

Windows 10. Additionally, it features the ability to generate customizable macros that have both regular and conditional actions. If you want to create new macros, you can do so by adding new actions and configuring them. KEYMACRO allows you to add a custom menu item to the system tray and access its actions from there. You can even create your own custom menus for special macros that would make your macros easier to use. You can configure the time of your macros by setting their start time and finishing time, and the exact dates that your macro should be active. You can also use the built-in clocks on your PC to set your macros to run at specific times of the day or week. A wide range of ready-made macros, including 9 sample actions, can be found in the KEYMACRO folder. You can create your own macros to be used with the software, as there is an easy-to-use interface. KEYMACRO can store the macros that you create on your PC and you can access them on any other computer, since they are stored locally. The software also comes with a shortcut to a website that provides you with thousands of ready-made macros for immediate download. You can even edit macros from the website and add them to your PC. What's new in KEYMACRO 1.24: - Bug fixes
