What's New in the?

This is a stand-alone freeware software which provides you the capability to demultiplex an OGM file. When starting a video stream you want to demultiplex/split, the OGMDemuxer will automatically create an AVI file for the video and create an Ogg file for the audio stream. The program also creates a SRT file (SubRip) for the text streams, an SRT file for the SubRip of a text stream, and a WMV file (WAVE-based) for the Windows Media Video stream. The OGMDemuxer also allows you to add streams for video streams which are not handled by the program itself. When adding a stream, you specify the name of the stream you want to add, the bitrate of the stream and the width and height. For audio streams, you specify the encoding type, the sample rate, the channels, the bitrate and the width and height. After running the program you may open the created AVI file in a file browser, the created Ogg file in the Vorbis player, and the created SRT file in the SubRip player. Features: *Auto creation of AVI files for video streams *Auto creation of Ogg files for audio streams *Automatic creation of SRT files for text streams *Automatic creation of SRT files for text streams (SubRip) *Automatic creation of SRT files for text streams (SubRip) (SubRip) *Automatic creation of SRT files for text streams (SubRip) (SubRip) *Automatic creation of SRT files for text streams (SubRip) (SubRip) (SubRip) (SubRip) *Automatic creation of SRT files for text streams (SubRip) (SubRip) (SubRip) (SubRip) *Automatic creation of SRT files for text streams (SubRip) (SubRip) (SubRip) (SubRip) (SubRip) (SubRip) *Automatic creation of SRT files for text streams (SubRip) (SubRip) (SubRip) (SubRip) (SubRip) (SubRip) (SubRip) *Automatic creation of SRT files for text streams (SubRip) (SubRip) (SubRip) (SubRip) (SubRip) (SubRip) (SubRip) *Automatic creation of WMV files for video streams *Automatic creation of WAVE files for audio streams *Add support for additional streams for video streams *Add support for additional streams for

System Requirements:
