Clipboard Cleaner is a software application that allows you to delete, clear or extract specific items from the Windows clipboard. You can also use it to delete or clear the entire Windows clipboard, or extract items from it. A frequent problem users have with the clipboard is that they copy something, then forget what was in the clipboard before the copy, and want to remove it so they don't accidentally paste it. The program allows you to clean the Windows clipboard as easily as copying a file to the Windows clipboard and then right-clicking it and selecting Delete. The name of the application is directly related to what it does. All you need to do is delete or clear items from the Windows clipboard using a right-click on the item. You can either select a specific item, or clear the entire contents of the clipboard. You can also use the program to extract text from the Windows clipboard by simply highlighting the items you want to extract and

pressing an available button. The application features a simple user interface. It does not feature a feature rich and functional software options, but all you need to do is select the action you want to perform on the clipboard and perform it on the breeze. When you select the action you want to perform on the clipboard, you will be presented with a list of items on the clipboard. You will also be able to use the program to perform a hot-key action on the clipboard, select items in the Windows clipboard, or even create a macro. For the most part the program is straightforward and easy to use. The lack of software options and the small size of the program makes it a suitable app for any type of user.
